Advanced Orthopaedics & Sports Medicine Announces 40th Anniversary Serving Patients Of Houston, TX

Houston, Tx., November 30, 2023 – Advanced Orthopaedics & Sports Medicine of NW Houston, Harris County announces 40th anniversary serving patient of Houston, Texas.

Dr. James P. Fogarty, one of Advanced Orthopaedics & Sports Medicine Founding Partners, opened a private orthopedic practice at 11800 FM 1960 Rd W in Houston, Texas back in 1983. At that time, the practice was named Cy-Fair Bone & Joint LLC. Shortly after opening his practice, Dr. William Dr. McChesney joined the growing practice, proceeded by Dr. Alain Elbaz and Dr. David Mack, both still actively practicing in the Houston, Cypress area. Cy-Fair Bone & Joint LLC was renamed Advanced Orthopaedics & Sports Medicine in 2001, and remains a private practice, the upside of which allows them to provide high quality orthopedic outcomes at the best value for patients.

Practice Administrator, Joseph Mathews, states, “What a reward it is to celebrate this anniversary as private practice. Through continual changes and challenges in the healthcare sphere, AOSM has remained independently owned and operated by a board of physician partners. Whereas many groups in the area over the past forty years have been absorbed by area hospitals or sold to private equity entities, we have continued to keep our independence. We couldn’t be prouder to remain in private practice, strengthened by our relationship with OrthoLoneStar.”

In 2021, Advanced Orthopaedics & Sports Medicine became the sixth division to join OrthoLoneStar, the largest privately owned orthopedic group in the state of Texas and the third largest in the nation with over 172 physicians and 36 locations.

Over the years, Advanced Orthopaedics & Sports Medicine has expanded to new areas of Houston including Cypress and the Towne Lake area, just south of Tomball in the Lakewood area, the Willowbrook area of Houston and most recently to Kingwood. With over 150 current employees and 17 physicians, AOSM is now the largest privately owned orthopedic group on the North side of Houston.

“Growth has been and continues to be a goal of Advanced Orthopaedics & Sports Medicine. With this growth comes the inevitable expansion of our facilities as well, both clinical and surgical. It was in that spirit that we were excited to announce earlier this year the opening of our hospital, Advanced Orthopaedics & Spine Hospital in Tomball, Texas,” states Managing Partner, Dr. Drew Fehsenfeld.

Advanced Orthopaedics & Spine Hospital is a musculoskeletal specialty hospital operates as a partnership between Advanced Orthopaedics & Sports Medicine and PSN Affiliates. As a physician-owned hospital, cash pricing for common services may be as low as a third of non-physician-owned hospitals.

To celebrate forty successful years serving patients of the Houston community, Advanced Orthopaedics & Sports Medicine will host a gala in Cypress, Texas, an exclusive event for staff, community partners and community leaders.

“We want to thank our patients for the past forty years. I am thrilled to celebrate this occasion with my staff and community partners, made possibly only by our loyal patients. To the patients, I want to say ‘You had a choice. Thank you for choosing private practice,’” states Dr. R. Alexander Mohr, Spine Surgeon.
